Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

In each of claims 3-6 and 11-13, what is referred to by the description "said channel selecting means" described first is unclear, since a description relating to "a channel selecting means" is not found before the said description.

In each of claims 3, 4, and 11-13, what is referred to by the description "said first channel list" described first is also unclear, since a description relating to "a first channel list" is not found before the said description.
